PROFESSIONAL SUMMARY

DevSecOps Engineer with 3.5+ years of experience in designing, automating, securing, and managing cloud infrastructure across **Microsoft Azure, AWS, and GCP**. Skilled in **Infrastructure as Code (Terraform), CI/CD automation, Docker, Kubernetes, cloud security, monitoring, and Linux administration**. Experienced in implementing **DevSecOps practices, infrastructure security scanning, vulnerability detection, secret detection, and secure CI/CD workflows**. Hands-on experience with **AI-assisted DevOps workflows, Large Language Models (LLMs), MCP (Model Context Protocol), and AI-powered automation** for infrastructure management, troubleshooting, scripting, documentation, and developer productivity.

TECHNICAL SKILLS

- **Cloud:** Microsoft Azure, AWS, GCP,
- **Azure Services :** Azure Virtual Machines, Virtual Network (VNet), Subnets, NSG, Load Balancer, Azure App Services, Azure SQL Database, Azure Storage Account, Azure Key Vault, Azure Bastion, Azure Firewall, Azure Monitor.
- **Infrastructure as Code (IaC):** Terraform (HCL), Terraform Modules, Remote Backend, State Management, Terraform Workspaces, State Locking.
- **Scripting & Automation:** PowerShell, Bash, Python.
- **Configuration Languages:** YAML.
- **Containerization:** Docker, Azure Container Registry (ACR), Amazon ECR.
- **Container Orchestration:** Kubernetes
- **CI/CD:** Azure DevOps Pipelines, GitHub Actions, Build & Release Pipelines.
- **Version Control:** Git, GitHub
- **Networking:** VNet, Subnets, NSG, Load Balancer, VNet Peering, VPN Gateway, DNS , Hub-and-Spoke Architecture.
- **Identity & Security:** Microsoft Entra ID (Azure AD), IAM, RBAC, OAuth 2.0, Managed Identities, Managed Identity, Azure Policy, Microsoft Defender for Cloud, DevSecOps.
- **Monitoring & Logging:** Prometheus, Grafana, Azure Monitor, Log Analytics , CloudWatch , CloudTrail, Log Analytics Workspace, Application Insights.
- **Cloud Management:** Azure CLI, Azure Portal.
- **AI & Generative AI:** Large Language Models (LLMs), Generative AI, Prompt Engineering, AI-Assisted DevOps, AI Automation (LLMs | Generative AI | Prompt Engineering | AI-Assisted DevOps)
- **AI Tools & Integration:** AI Coding Assistants, MCP (Model Context Protocol), LLM Tool Integration, AI-Powered Developer Tools (Antigravity | MCP | AI Coding Assistants | LLM Tool Integration)
- **AI Tools:** Antigravity | AI Coding Assistants | LLM Tools | MCP
- **DevSecOps:** Secure CI/CD, Infrastructure Security Scanning, SAST, Secret Scanning, Vulnerability Detection, Security Automation
- **Operating Systems:** Linux Administration.
- **Web Servers:** Nginx , Apache.

PROFESSIONAL EXPERIENCE

One Click Insurer Web Aggregator Pvt. Ltd.
DevOps Engineer
Key Responsibilities:

- Worked as a **DevOps Engineer**, contributing to cloud architecture reviews and implementing best practices to improve application reliability, scalability, and operational efficiency.
- Designed, deployed, and managed cloud infrastructure across **Microsoft Azure**, and **AWS** using **Terraform (Infrastructure as Code)**.
 - Developed and maintained **CI/CD pipelines** using **Azure DevOps** and **GitHub Actions**, enabling automated build, test, and deployment processes across **Development, QA, UAT, IAT, and Production** environments.

 June 2024 - Present Noida, India

Key Responsibilities:

- Created and maintained **YAML-based pipeline** configurations to automate application deployment and infrastructure provisioning.
- Automated infrastructure provisioning and operational tasks using **PowerShell, Bash, and Python scripts**.
- Managed source code repositories, branching strategies, and version control using **Git and Azure Repos/GitHub**.
- Implemented infrastructure security scanning to identify security vulnerabilities and exposed secrets in **Infrastructure as Code repositories**.
- Configured and managed **Microsoft Entra ID (Azure AD), RBAC, IAM, and OAuth 2.0** to ensure **secure identity and access management**.
- Deployed and managed **cloud services, including Azure App Services, Azure SQL Database, and Azure Key Vault**, while following security and compliance best practices.
- Managed cloud networking components such as **Virtual Networks (VNet), Subnets, NSGs, Load Balancers, VNet Peering, and Hub-and-Spoke Architecture**.
- Collaborated with **development, QA, and operations** teams to streamline release processes and implement DevOps best practices across **multi-cloud environments**.
- Utilized **AI-assisted DevOps tools and Large Language Models (LLMs)** to support **troubleshooting, scripting, documentation, and infrastructure automation activities**.
- Explored **MCP (Model Context Protocol)** for **integrating LLM-based AI tools with DevOps workflows and external tools**.
- Leveraged **AI-assisted workflows** to analyze **Terraform configurations, YAML pipelines, deployment issues, and operational tasks**.

Azadpay Technology Pvt. Ltd.

Cloud Engineer

March 2023 - June 2024

Noida, India

- **Progression:**
- **Senior Cloud Engineer** (*Oct 2023 – June 2024*)
- **Associate Cloud Engineer** (*March 2023 – Oct 2023*)

Key Responsibilities

- Provisioned, configured, and managed cloud infrastructure on Microsoft Azure using **Terraform (Infrastructure as Code)**.
- Managed the complete lifecycle of cloud resources, including provisioning, configuration, scaling, maintenance, and decommissioning.
- Configured and maintained Azure services, including **Virtual Machines (VMs), Virtual Networks (VNet), Subnets, Network Security Groups (NSG), Azure Storage Accounts, Azure Load Balancer, Azure App Services, Azure SQL Database, and Azure Key Vault**.
- Designed and managed Azure networking components, including VNet Peering and Hub-and-Spoke architecture, to ensure secure and scalable connectivity.
- Implemented and managed **Role-Based Access Control (RBAC)** and **Microsoft Entra ID (Azure AD)** to enforce secure identity and access management.
- Assisted in implementing secure authentication and authorization mechanisms using **OAuth 2.0**.
- Managed **Azure subscriptions**, including **onboarding, offboarding, resource governance, and access management**.
- Automated infrastructure provisioning and administrative tasks using **Terraform, Azure CLI, PowerShell, and Bash**.
- Applied cloud security best practices, **governance policies**, and resource tagging standards to maintain compliance.
- Collaborated with **development, security, and operations** teams to support cloud infrastructure deployments and operational requirements.
- Created and maintained technical documentation, **infrastructure configurations**, and **standard operating procedures (SOPs)** for cloud environments.

PROJECTS

Cloud Infrastructure Automation using Terraform

Technologies: Microsoft Azure, Terraform (HCL), Azure CLI, PowerShell, Git.

- Automated Azure infrastructure provisioning using **Terraform (IaC)**.
- Deployed and managed **Azure resources, including VNets, NSGs, App Services, Azure SQL Database, and Azure Key Vault**.

CI/CD Pipeline Automation

Technologies: Azure DevOps, GitHub Actions, YAML, Git, PowerShell, Bash

- Built CI/CD pipelines using **Azure DevOps and GitHub Actions**.
- Automated build, testing, and deployment using **YAML pipelines and scripting**.

Docker & Kubernetes Containerization

Technologies: Docker, Kubernetes, AKS, ACR

- Containerized applications using **Docker** and managed images with **Azure Container Registry (ACR) & (ECS)**.
- Deployed and managed **containerized applications on Azure Kubernetes Service (AKS) & (EKS)**.

Secure Cloud Networking & Identity Management

Technologies: Microsoft Azure, Microsoft Entra ID (Azure AD), OAuth 2.0, Azure Key Vault

- Configured **Azure networking**, including **VNet, NSGs, VNet Peering, and Hub-and-Spoke Architecture**.
- Implemented **Microsoft Entra ID (Azure AD), Azure RBAC, OAuth 2.0, and Azure Key Vault** for secure access and secret management.

AI-Powered DevSecOps & LLM Automation

Technologies: LLMs, AI Tools, MCP, Python, Terraform, Azure DevOps, GitHub Actions, YAML, DevSecOps

- Built an **AI-assisted DevSecOps workflow** for infrastructure analysis, **CI/CD troubleshooting**, and **automation**.
 - Used **LLM-based tools** to assist with **Terraform configuration analysis**, **YAML pipeline generation**, **troubleshooting**, and **technical documentation**.
 - Explored **MCP (Model Context Protocol)** to enable **AI/LLM-based tools** to **interact with DevOps resources and workflows**.
 - Applied **AI-assisted automation** to reduce repetitive **DevOps tasks** and improve developer productivity.
-

EDUCATION

ISBM UNIVERSITY

Bachelor of Technology in Computer Science (B.Tech-CS)

08/2019 - 06/2023

Chhattisgarh, India

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. I take full responsibility for the authenticity of the details mentioned in this resume.
